Hi Harry

Thanks for the voice message and email. The October date now appears to be optimistic and a November date is probably more realistic. For the group, what does Nov 10-11 look like?

Best

Gene

Gene: Very nice to meet with you last week. Thank you for taking the time to catch up on Anaconda - a very interesting project. At our meeting, you suggested a follow up discussion in October between EPA, BLM, and NDEP. We think that is a great idea and understand that NDEP is also supportive. The calendar may be tricky however. Due to possible shutdown, we are not planning any travel during the first full week of October (starting 10/05). I understand that NDEP has a conflict during the week of October 12, and we have a conflict during the week of October 19. That leaves us with the week of October 26. My conversation with Jeff Collins at NDEP indicates a preference for October 28 or 29 (or both if we want to plan a trip to the site as well). If the end of the month does not work for you folks, we can certainly look into

November dates. Again, many thanks for your time the other day. Regards, Harry
